PRECUT READY-TO-APPLY

## SpiderTech™ Clinical Certification Course Hands-On Clinically-Based Certification Training

SpiderTech offers the opportunity to undertake the full day Kinesiology Taping Training Event for Therapists, Practitioners, Educational Institutions and Private Facilities. This will provide the progressive Therapist the necessary skills to apply SpiderTech's revolutionary method of Kinesiology Taping, and to integrate this form of care into your professional development and practice.

### COURSE OVERVIEW

The SpiderTech Clinically Based Theory and Application Course is a full day training and certificate program intended to develop a further clinical understanding of a functional medicine approach to modulating pain and myofascial dysfunction through the use of specialized taping applications within various clinical scenarios. Participants will be provided with the most current applied science, theory and clinical application of Kinesiology taping. The course will also help participants develop the practical skills necessary to apply SpiderTech Applications using our clinical-case based techniques.

The course is open to licensed healthcare providers and students, i.e., Physiotherapists, Exercise Physiologists, Chiropractors, Traditional Chinese Medicine Practitioners, Massage Therapists, Medical Doctors, Nurses, Occupational Therapists and Osteopaths.

### PROGRAM OVERVIEW

Each participant will receive the following:

- One Course Manual
- Access to the SpiderTech E-Learning site to better prepare participants
- Certificate after completion of Hands-on and On-Line Learning components of the Course
- One full set of SpiderTech Applications (for use during the hands-on course, AUD ~\$250 value)
- Three SpiderTech Applications of choice for each therapist to "take home" for clinical use or further practice (AUD ~\$42 value).
